

# Disclaimer form for Children and Adults

## BELL pharmacy vaccination services

We at Bell Pharmacy prioritize the health and safety of all our patients, especially the little ones. However, we must respectfully inform you that we are unable to provide vaccinations for children **under the age of 2 years old.**

Also:

1:

If a child is particularly active and does not allow us to administer the vaccine, any fees paid for the vaccine will not be refunded. We kindly ask for your understanding in this matter.

2:

If a child declines to receive the vaccine and the parents or guardians are unwilling to securely hold them during the procedure, we reserve the right to refuse administration due to safety concerns. While we understand that some parents prefer to communicate with their children rather than physically restrain them, it is imperative to prioritize safety. Therefore, we regret to inform you that we cannot proceed with the vaccination under such circumstances.

Thank you for your understanding and cooperation.
